

# IEA Statistical Capacity Building Approach

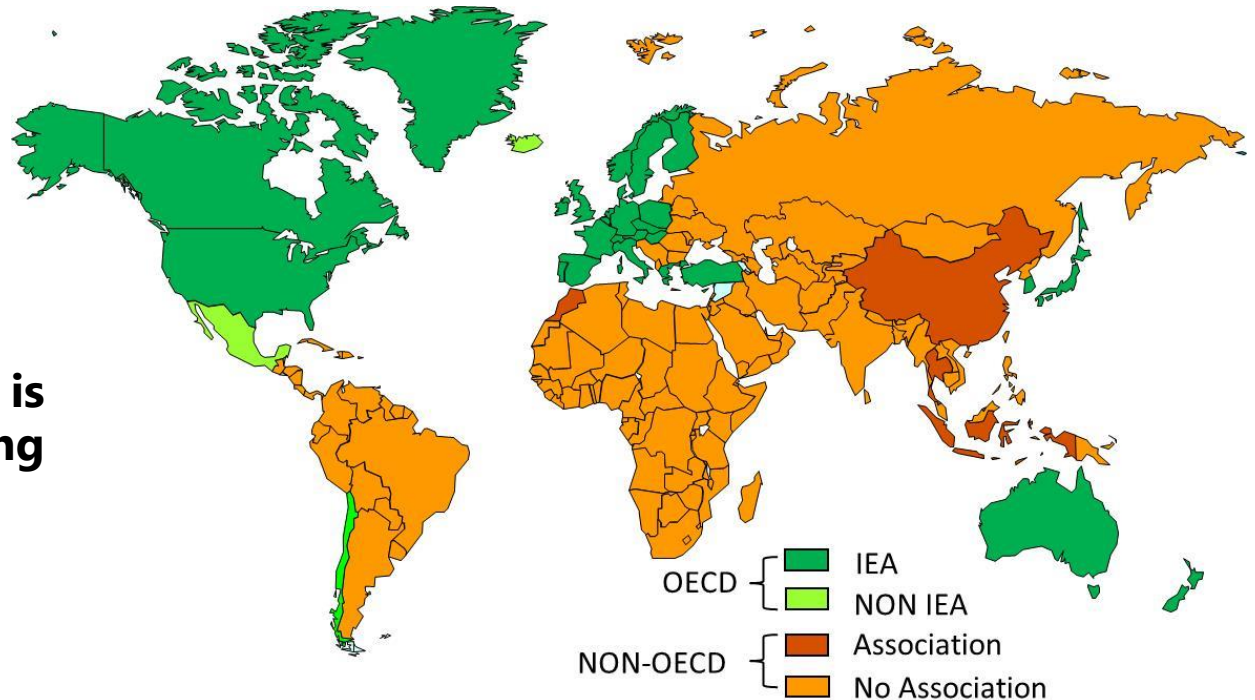

---

Céline Rouquette & Axelle Julin, Energy Data Centre  
PARIS21 Annual Meeting, Paris, April 5<sup>th</sup>

- Data collection at the International Energy Agency
- IEA statistical Training and Capacity Building activities
- How do they lead to strengthening national statistical capacity?

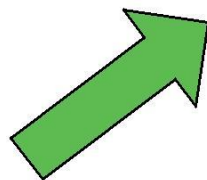

- IEA collects data from 150 countries, on a voluntary basis for all non-OECD countries

**Capacity Building is central to improving data quality**

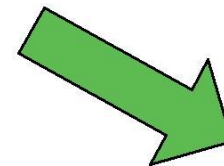

- **Energy Statistics Courses held at IEA headquarters (Spring and Autumn)**
- **Partnering to develop regional courses**
- **Partnering to develop national courses**
- **Augment online training and webinars**

# How do they lead to strengthening national statistical capacity?

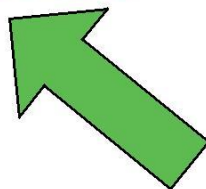

Increased cooperation between national agencies staff

Manuals help harmonisation between national agencies

Training contributing to continuous improvement in data quality

Alumni become the IEA "ambassadors" within their countries

Strengthened relations with country focal points
