

NSDS STATUS IN IDA COUNTRIES

Progress report as of 15 February 2008

The following table presents the status of NSDS in International Development Association (IDA) borrower countries as of early February 2008. The information is drawn from four principal sources: (1) Direct information provided by countries; (2) Country work of PARIS21 Regional Advisors; (3) Websites of key development partners (in particular the World Bank's Country Statistical Information Database); (4) Websites of countries' national statistical offices.

The table is sorted by geographical region and by status of the NSDS process, namely countries with existing strategies, countries in the process of designing a strategy, and countries with no NSDS process. It should be noted that, while existing strategies may not necessarily follow the guidelines of the NSDS, most strategies currently being designed follow the guidelines. This table is updated on a regular basis, as information is received, and is available on the PARIS21 website.
