The following table presents the status of National Strategies for the Development of Statistics (NSDS) in International Development Association (IDA) borrower countries, Least Developed Countries, Low and Lower-Middle Income Countries, and some Upper-Middle Income Countries (in order to report on the whole of the African continent), as of March 2014. Non–IDA countries are identified in the table with an asterisk. The information is drawn from three principal sources:

- Direct information provided by countries to PARIS21;
- Websites of key development partners (in particular the World Bank’s Bulletin Board on Statistical Capacity); and
- Websites of countries’ national statistical offices.

The table is sorted by geographical region and provides information on existing strategy, next NSDS and PRSP (or National Development plan) time span. It should be noted that while existing strategies may not necessarily follow the NSDS guidelines, most strategies currently being designed do follow them. This table is updated semi-annually, and is available on the PARIS21 website at http://www.paris21.org.

**Legend**

* Lower Middle Income countries, as defined by the OECD Development Assistance Committee List of Recipients of Official Development Assistance ([www.oecd.org/dac/stats/daclist](http://www.oecd.org/dac/stats/daclist)). In order to facilitate trend analyses across all NSDS reports, the DAC list used is that of 2013. These tables also include some Upper Middle Income Countries in order to report on the whole of the African continent.
