NSDS STATUS IN IDA AND LOWER MIDDLE INCOME COUNTRIES

Progress report as of October 2012

The following table presents the status of National Strategies for the Development of Statistics (NSDS) in International Development Association (IDA) borrower countries, Lower Middle Income countries, and some Upper Middle Income Countries (in order to report on the whole of the African continent), as of October 2012. Non-IDA countries are identified in the table with an asterisk. The information is drawn from three principal sources:

- Direct information provided by countries to PARIS21;
- Websites of key development partners (in particular the World Bank's Bulletin Board on Statistical Capacity); and
- Websites of countries' national statistical offices.

The table is sorted by geographical region and provides information on existing strategy, next NSDS and PRSP (or National Development plan) time span. It should be noted that, while existing strategies may not necessarily follow the NSDS guidelines, most strategies currently being designed do follow them. This table is updated on a regular basis, as information is received, and is available on the PARIS21 website at <http://www.paris21.org>.
